TIN MINES LTD

- **Listed** - 26 February 2008
- **Portfolio** - advanced tin exploration projects in the lower Herberton Tin Field in northern Queensland
- **Company Vision** - to develop the Mt Garnet Tin Project into a major, long life hard rock tin mining project
- **Development plan** - open pit mining operation producing 5,000t tin metal in concentrate per annum with initial mine life of 8-10 years
- **Project Areas** - with JORC resources currently containing 44,400t tin:
 - Gillian
 - Pinnacles
 - Windermere
- **Upside** - Significant upside in exploration potential with low tin production costs of approximately AUD\$11,250 per tonne & high tin sales prices of AUD\$27,000 per tonne

Project Overview

- Current Mt Garnet Project JORC Tin Resource 7.4 Mt @ 0.6% tin
 - **Gillian - 3 Mt @ 0.80% Tin**
 - **Pinnacles - 1.87 Mt @ 0.41% (Ave) Tin**
 - **Windermere - 2.1Mt @ 0.55% Tin/Deadmans Gully - 401,500 t @ 0.49% Tin**

- Target 8 to10 Mt @ average tin grade 0.5% to 0.6%*

- Open pit low cost mining

- All three project areas remain open, both at depth and laterally

- Project well positioned relative to major road, rail and port infrastructure

- Project also has a **JORC Iron Resource** of 5.3 million tonnes, and a **JORC Fluorine Resource** of 960,000 tonnes – **potential production credits**

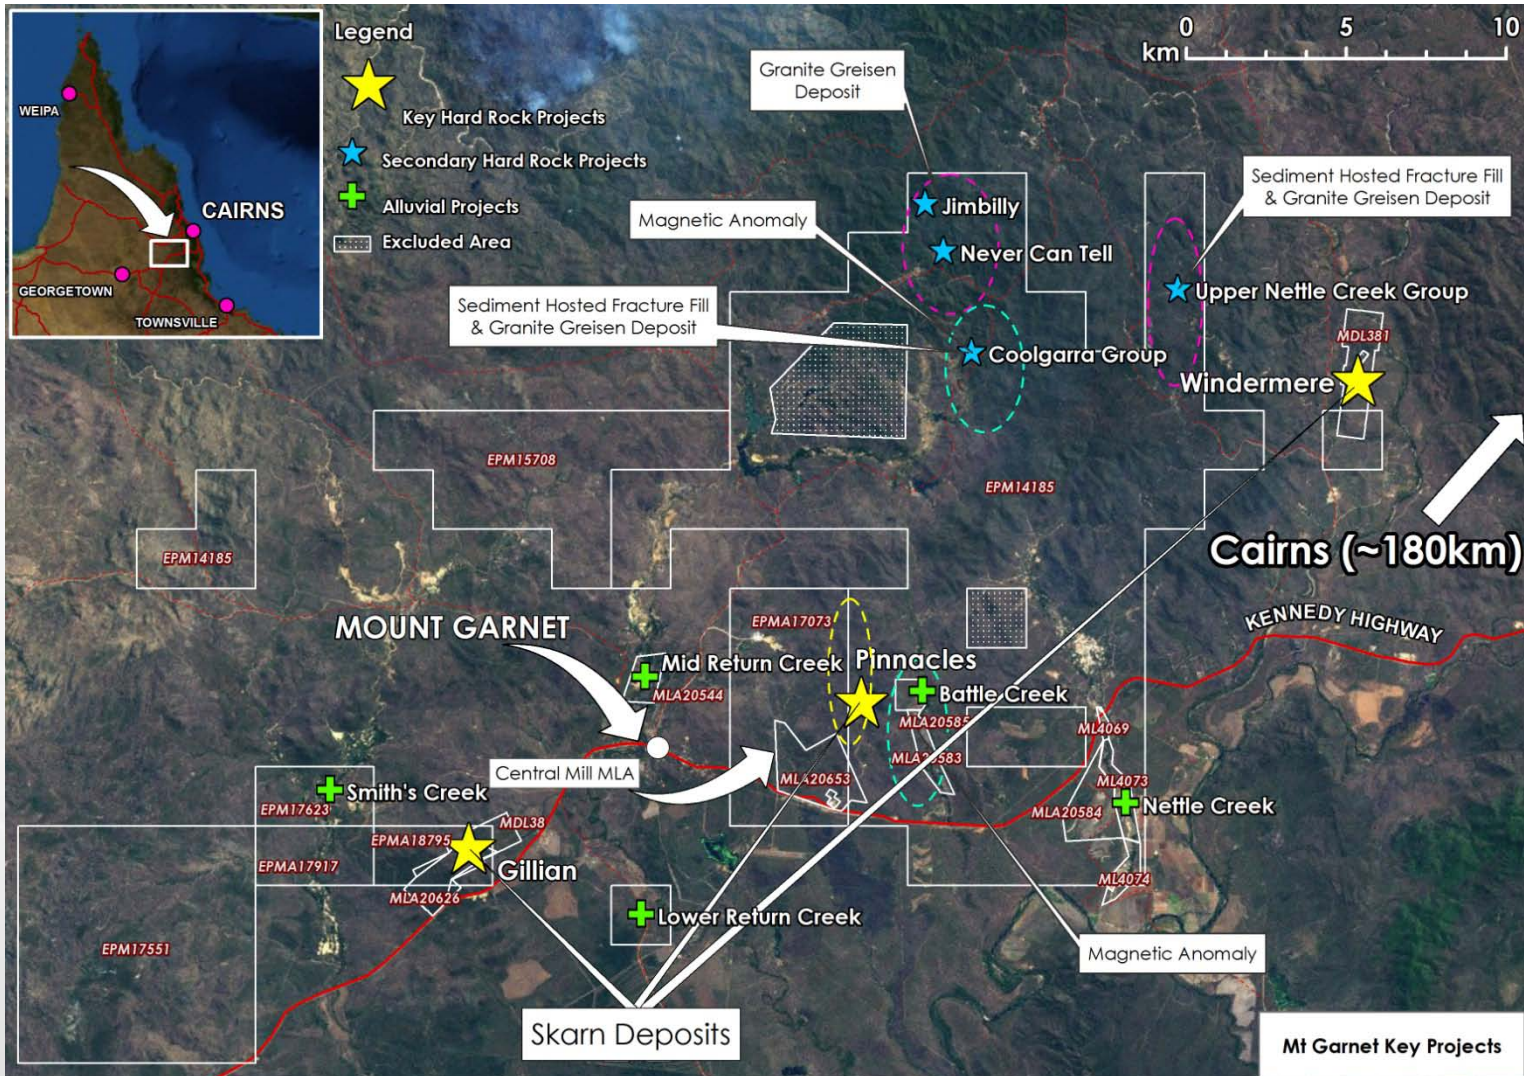

*Target mineralisation: This target resource statement is conceptual in nature as insufficient drilling has been undertaken at this stage & it is uncertain that future drilling will result in the determination of this target

Project Overview (cont)

- Geology - Outcropping skarn mineralisation with iron rich hematite/magnetite rock
 - Gillian - 1.1 km strike length
 - Pinnacles - 3.5 km strike length
 - Windermere/Deadmans Gully - 2.5 km strike length
- Limited drilling has been conducted on Windermere
- Standard processing circuit based on grinding and a combination of magnetic, gravity, flotation and fuming recovery
- Detailed testwork near completion and pilot plant testing to be carried out at Greenbushes Tin
- Preliminary scoping study completed which shows positive project economics
- Evaluating potential alluvial tin deposits which can be brought into production with relatively minimal capital outlay and a short time frame
