## Key Points

- Consolidated Tin has secured the registration of an ILUA with the native title claimants for the Mt Garnet area
- This is a milestone event for the company
- The ILUA provides a clear native title process for the grant of all mining tenure within the ILUA boundary
- The registration of the ILUA represents the foundation for the development of a long-term mutually beneficial relationship between the Bar-Barrum native title claimants and CSD

## Consolidated Tin Mines & Bar-Barrum People – Indigenous Land Use Agreement registered

Consolidated Tin Mines Limited (ASX: CSD) (the Company) is pleased to announce that the Indigenous Land Use Agreement (ILUA) with the Bar-Barrum Aboriginal Corporation and the Bar-Barrum People, the registered native title claimants for Mt Garnet region, was registered with the National Native Title Tribunal (NNTT).

The registration with the NNTT makes the agreement, signed on 25th March 2011, fully operative and represents a milestone event for the Company in the development of its Mt Garnet Tin project.

The ILUA provides the Company with a clear native title process for the grant of all mining tenure within the ILUA boundary. This will allow the development and mining of the existing Mt Garnet tin projects and also include other newly identified mineralised zones in the area.

The Mt Garnet area offers vast areas of tin mineralisation that the Company believes could potentially provide a source of tin to support the company's objective to establish mining operations in the Mt Garnet region. The ILUA allows CSD to be granted exploration and production mining tenure within the ILUA area and provides the Bar-Barrum People with a package of benefits and opportunities related to the mining activities of the company.

The ILUA concludes three years of negotiations between the parties and has created the foundation for the development of a long-term mutually beneficial relationship between the Bar-Barrum native title claimants and the Company.

**About Consolidated Tin Mines:**

Consolidated Tin Mines is an emerging ASX-listed (ASX: CSD) tin explorer and developer, whose major project is the Mt Garnet Tin Project near Cairns in Queensland, Australia. The project is located in an established mining area, close to all infrastructures, in the Herberton Tin Field. Consolidated Tin's objective is to develop it into a major low cost, open pit tin mining operation.

The Mt Garnet project is made up of three key deposits; the Gillian, Pinnacles and Windermere deposits. The Company's development strategy is to confirm an initial JORC Resource base of 8Mt-10Mt of tin from the three deposits, to feed a proposed centralised mill and process about one million tonnes per annum to produce about 5,000tonnes of tin per annum.

Consolidated Tin has conducted extensive exploration programs at the project, and it has a total current JORC Resource of 7.3Mt @ 0.60% Tin. This includes a JORC Measured Resource of 1.2Mt @ 0.82% Tin at the Gillian deposit. In addition, the project also has an iron Resource of 5.2Mt @ 26.39% Iron which is upgradeable to a high grade Fe product.

Targeted drilling designed to update the project's Resource base is ongoing, and drilling is also underway at a new area at the project, the Coolgarra Group. The Company is also progressing pre-feasibility study work at Mt Garnet, which will play a key role in its future mine development plans.
