ASX ANNOUNCEMENT / MEDIA RELEASE

EXPLORATION PROJECT UPDATE

Consolidated Tin Mines Limited (ACN 126 634 606) (ASX Code: CSD) ("**CSD** or **Company**") is pleased to announce an update on Company exploration projects.

The company has completed drilling targets within the granted mining leases at the Surveyor/Balcooma mine site. The drill rigs will be demobilised, and the Company will assess the results once all assay results have been received. Following this the Company will plan future drilling at Surveyor in areas that show potential. Results will be announced to the market as they become available.

The infill drilling within the Kaiser Bill proposed pit shell is nearing completion with final holes expected to be completed by the end of July. This drilling will include core samples that will form part of ore sorting trials.

The drill rigs at Einasleigh will be demobilised on completion of this infill drilling. The Company will review these drilling results once all assay results are received. Results will be announced to the market as they come available.

The Company will retain key geology staff including the regional target-generation team at Einasleigh.

The Company will review all assay results once received and develop drill proposals that may be implemented later in the year.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.
